

Lunghwa University of Science and Technology, LHU

The university was established in December 1969 in order to cultivate professional and technical talent and contribute to the national industries. Upholding “Practicality, Excellence and Innovation” as its educational philosophy, the university has made tremendous growth under the support of government-funded programs and university-industry cooperative research and development as well as with the great efforts made by the entire faculty and staff. Lunghwa is conveniently located between Guishan, Taoyuan and Xinzhuang, Taipei, just about one kilometer away from Taipei MRT Huilong Station.

The features

- First to offer customized career programs based on talent need, including jointly-planned courses, arranged internships and employment priority in addition to inviting entrepreneurs to teach course and advise students projects
- Training interdisciplinary innovative talent for Asian Silicon Valley and building state-of-the-art facilities such as ‘3D Digital Circuit Board Design and Smart Manufacturing Production Line Lab,’ ‘Artificial Intelligence, IoT, Edge Computing Joint Lab,’ ‘Deep Cultivation of High-end Processing Technology and Smart Manufacturing Production Line Lab (PCB & SMT),’ as well as ‘High-end Processing and Intelligent Research and Development Center.’
- Academia and industry collaboration with internationally renowned enterprises such as QUANTA, INVENTEC, ASC, and TBI Motion and great career development opportunities for students.
- Featuring outstanding teaching and research faculty with 600 full time and part-time teachers; 91% of full time teachers featuring assistant professor rank above and 77% with doctoral degree.
- International cooperation including sister universities in the US, UK, Japan, and Korea, enrolling 1000 international students in 2019, and encouraging and rewarding students who win awards, perform well in extracurricular activities, or obtain foreign language certification to go abroad to expand their opportunities
