## 學校簡介 About Us

WuFeng University is the first school which regards safety as its core value and cultivates professional skills, humanistic qualities, and international perspective of elite in this era. We emphasize research innovation along with social service and devotes to becoming the top 1 private technology university setting up the outstanding learning environment and the quality of instruction in vocational education system.

### **Mission**

We cultivate professional talents of each field who are able to form the conception of safety to fulfill the practical belief of vocational education. We also educate those about the innovation and problem solving skill, respecting the value of life, and caring about the meaning of life. These talents are expected to contribute to society, improve the group life, and make life more secure.

### **Values**

“Excellence、Efficiency、Commitment、Integrity”

While implementing education, research, service, and other affairs, we always hold the positive attitude, pursue the excellence, and focus on the efficiency. In the aspect of personality education, we require all faculty and students possess the spirit of contribution and good character ; In the aspect of professional field, we stress the cultivation of professional skill. We are pursuing Safety and Security First, Quality First, and Service First with values of excellence, efficiency, commitment, and integrity in order to build the basis for sustainable development and make school more competitive in the future.

### **Goals**

Global, Diversity, Information Technology, Professional Development, and Community Service

Introduction | Dean's Office | Academic Programs

» Introduction

The College of Security & Engineering was established in February, 2010. The primary objectives of this college are to cultivate students with both theoretical and practical skills, humanities, social responsibilities, and global awareness. The college focuses on the most important industry areas, particularly the security technology, offers corresponding academic programs. The aim of the college is to educate students to become future high-tech engineers.

The college consisted of one graduate school and six departments as follows:

1. Graduate school: Graduate school of Opto-Mechatronics and Materials
2. Departments:
  - (1) Department of Mechanical Engineering
  - (2) Department of Electrical Engineering
  - (3) Department of Fire Science (including a Master Degree program)
  - (4) Department of Security Technology & Management

Most of the four departments have 4-year and 2-year programs. They also have daytime, evening, and weekend programs. The college has well qualified faculty members, approximately 70 % of them hold doctoral degrees in the areas of their specialties, and all faculty members hold one or more professional certificates or licenses. To meet the teaching and research demand, the college has complete sets of equipment, comprehensive design and analysis engineering software, and well-equipped experiment facilities in each department or graduate school.

1. Department of Fire
2. Department of Safety Technology and Management
3. Mechanical Engineering
4. Department of Electrical Engineering
5. Department of Vehicle Technology and Management
